Available: May 2027- Aug 2027

EDUCATION

First Year B.S. Mechanical Engineering (Robotics/Embedded Systems Focus)

Rochester Institute of Technology

Expected 2031

Rochester, NY

SKILLS

Programming: Python

Embedded Hardware: Arduino | Ultrasonic Sensors | Servo Motors | Breadboarding

Software: Onshape, (in progress), Excel

Languages: English | Korean | Spanish

PROJECTS

Multi-Disciplinary Robotics Club - Ultima

August 2026 – Present

- Constructing a structural frame to carry 16"x8", 20lb payload while staying stable in motion, and contributing design ideas alongside upperclassmen leads
- Cut metal rods with a cold saw, and drilled holes into a polycarbonate payload board
- Collaborating with team leads and members on design to ensure frame stability under payload weight

Automatic Water Dispenser - Personal Project

May 2026 – August 2026

- Developed an automatic water dispenser to solve a daily problem using Arduino by integrating an ultrasonic sensor to detect water levels, combined with a 20kg torque servo motor
- Resolved a problem with a lack of force for the dispensing button with a strap-based mount, using the dispenser's chassis as a mass to counteract the actuation force
- Saved an average of **3 mins** in the morning by performing my morning routine while filling my bottle simultaneously

WORK EXPERIENCE

HardyPaw

May 2026 - July 2026

Warehouse Associate

Livermore, CA

- Rotated across picking, packing, and inventory stocking in a fast-paced environment
- Optimized inventory count system through creating a new system in Excel, saving about **~50 mins a day**
- Operated a cardboard baler to clean waste and recycling

Von's Chicken

May 2025 – August 2025

Cashier

Livermore, CA

- Operated POS system for orders and payment processing
- Maintained composure and accuracy in a fast-paced food service environment
- Provided fast and accurate service at the register during high-volume rush periods

LEADERSHIP & ACTIVITIES

Hwarang - Dublin Chapter President

August 2024 - June 2025

- Fundraised **\$1000+** for a Guatemala eye surgery camp through a garage sale
- Increased chapter member count by **30%**
- Led community service events including local park cleanups, teaching students the Korean language, and serving the elderly at a senior center

Interests

Robotics/Automation | Gym | Video Games | Sports
